Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: Claim 1 is considered allowable over the prior art of record insofar as none of the prior art anticipates or suggests the top and sidewall construction as specifically set forth in the claim. Claim 1 defines a first sidewall with an upper free edge and a first opening, a second sidewall with an upper flap defining a handle portion, a third sidewall with an upper flap having a slot to receive a handle and a second opening capable of cooperating with the first opening to receive the mouth of an inner liner and a fourth sidewall with an upper flap defining a second handle portion. As was asserted in the interview of 02 February 2006, by forming the top from three flaps and with the second opening of the third sidewall flap cooperating with the first opening in the first sidewall to receive the mouth of the liner, the container is more easily assembled by the retail user from the collapsed form as compared to using a four flap construction known in the prior art. None of the prior art suggests the combination being claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
